Linear Algebra
MWF 1:25pm – 2:20pm
Zurn 226

Homework Guidelines.

- Graded homework in this course must consist of complete, neatly written solutions to the assigned problems. I am very interested in seeing the method of solution, not just the answer. If a final answer is given without a sufficient amount of work, then you may receive little or no credit for the problem.
- Assignments are due at the beginning of class. No late assignments will be accepted.
- Print your name and “Math 252” at the top of the first page.
- Staple all pages of your homework before submission.
- Label each problem by section and number. The problems should be written out in the proper order when submitted.
- Start each problem with a *brief* summary.
- Discussing the solutions to problems with others is permitted and encouraged. You must, however, turn in your own copy of the homework with your own written solutions unless told otherwise. Photocopying or writing word-for-word copies would constitute academic misconduct.
- Failure to follow these guidelines may result in the loss of points on assignments.
